

4 TIPS TO PREVENT CYBER ATTACKS

THINK BEFORE YOU CLICK

Any message, phone call or email that persuades you to reveal your passwords, social security number, credit card numbers, should be a matter of concern.

USE STRONG PASSWORDS

Make sure to use different passwords for all your apps and websites. Your master password should be strong, and you should secure your password manager account with MFA!

PROTECT YOUR & OTHERS INFO

Always check to make sure we have a NYS Ed-Law 2-D compliant agreement with a digital company before uploading any Personally Identifiable Information (PII).

ACCOUNT SECURITY

Leaving your workstation? Click the Windows  and L keys simultaneously on your keyboard to lock your windows device. Just enter your password to unlock it again!
